

Cancer Systems Biology and Bioinformatics postdoctoral position.

Postdoctoral research position jointly within the labs of Thomas Graeber and David Nathanson for collaborative multi-omics integration-based cancer biology research. Working within a team spanning from clinical trials to basic science, and immersed in the UCLA/NIH Brain Cancer SPORE and UCLA Metabolism Theme. Interrogation of genetic, epigenetic, transcriptome, metabolism and other data types. Investigation of disease mechanisms, and mechanisms of response and resistance to synergistic therapies. Research opportunities in both independent and collaborative research projects in cancer and immunotherapy.

Track-record of contributions and publications to cancer or disease research, working both independently and in a team/collaborative environment. Knowledge of scripting, programming, sequencing analysis and common bioinformatic algorithms and programs required. Prior biological experimental research a plus.

Interested applicants please send a cover letter, curriculum vitae (CV) and the names/contact information of three references to Dr. Thomas Graeber.

Thomas Graeber, PhD. (contact)

Professor, Molecular & Medical Pharmacology

Director, UCLA Metabolomics Center
